ACAA received survey data representing 232,437 Megawatts Name Plate capacity of the total industry-wide approximate 331,091 MW capacity based on EIA data

The data received this year represents approximately 76.2 % of the coal consumed in 2011 by electric utilities and IPPs (704,495,850 tons)

\* These are actual tonnages reported by utilities responding and **do not reflect estimates for utilities that did not respond** this year.

\*\*These numbers are derived from previous, current and applicable industry-wide available data, including Energy Information Administration (EIA) Reports 923 and 860 and other outside sources.

\*\*\*Utilization estimates are based on actual tons reported and on **extrapolated estimates for fly ash, bottom ash, and FGD gypsum**;
